PREFACE

THIS little book has grown out of a need felt in my own Caesar classes for some easy but systematic work in Latin Composition. Its purpose is not to present in most comprehensive fashion all the peculiarities of Latin syntax, but by constant repetition to fix in the student's mind some of the simplest constructions of nouns and verbs. All special grammatical notes in the several lessons have been omitted, that the pupil may early form the habit of constant reference to his grammar. Since the book is to be used in connection with Caesar, the constructions emphasized are those recurring most frequently in his text. Imperatives and independent subjunctives have therefore been lightly touched upon. The more difficult varieties of final and consecutive clauses and of relative sentences have been purposely omitted, from the conviction that the child should understand the rule before he considers its exceptions.

The finding of phrases illustrative of the principles of syntax introduced in each lesson has been left to the teacher as a valuable class-room exercise. It has been my own practice to have the sections marked "Class Work" written without the aid of the grammar, making each pupil depend for forms and rules entirely upon his own memory. I have also found that a clear tabular statement of the principles studied, with the proper references to the grammar, is of great help in reviewing. Such

a table each class may provide for itself by adding to the several topics in Lessons XIV and XXV the numbers of the paragraphs in its own grammar which bear upon the subject.

In addition to the general vocabulary at the end of the book, common words have been grouped together in the special vocabularies which should be committed to memory as a part of each lesson.

The object, then, of the book is to guide the pupil along the beginning of the road to a knowledge of Latin. It will not have failed entirely of its purpose if it does nothing more than teach a proper regard for the concords.

Thanks are due to the friends whose suggestions and interest have been helpful, and especially to Dr. Charles Knapp of Barnard College for careful reading and correcting of the proof.

He marched twelve miles that night, and fought with the Britons near a small river. On the following day, however, a messenger came to report that a storm had damaged the ships. After delaying ten days for the sake of repairing these, he set out again against greater forces of the Britons. His army, however, easily drove them off, and, the next day, crossed the river Thames. Then the tribes began to send ambassadors to ask for peace. A few days later, Caesar led his legions back to the sea and embarked. All his ships reached Gaul unharmed.

Harkness's New Latin Grammars

A COMPLETE LATIN GRAMMAR
Cloth-leather binding. 12mo, 464 pages $1.25

A SHORT LATIN GRAMMAR
Cloth-leather binding. 12mo, 254 pages 80

By ALBERT HARKNESS, Ph.D., LL.D., Professor Emeritus in Brown University.

These new text-books are the crowning triumph of a life-work which has made the name of their author familiar to classical scholars and teachers everywhere. They represent the latest advances in philological science, and embody the results of the author's large experience in teaching and of his own linguistic studies, together with the suggestions and advice of eminent German specialists in the field of Historical and Comparative Grammar. The peculiar qualities of simplicity, clearness, and adaptation of treatment to the practical needs of the student and of the class room,—qualities that have always characterized the Harkness Grammars,—have been preserved and even intensified in these new books.

The Complete Latin Grammar is designed at once as a text-book for the class room and a book of reference for the student. It aims not only to present systematically for the benefit of the beginner the leading facts and laws of the Latin language, but also to provide accurately for the needs of the advanced student.

The Short Latin Grammar is published for the benefit of those who prefer to begin with a more elementary manual, or those who do not contemplate a collegiate course. In the preparation of this work the convenience and interest of the student have been carefully consulted. The paradigms, rules, and discussions have in general been introduced in the exact form and language of the Complete Latin Grammar by which it may at any time be supplemented. The numbering of the sections in the two books is also alike.

Copies of the books will be sent, prepaid, to any address on receipt of the price by the Publishers:

Harper and Burgess's Elements of Latin

By WILLIAM R. HARPER, Ph.D., D.D., LL.D.
President of the University of Chicago

AND

ISAAC B. BURGESS, A.M.
Professor of Latin in the Morgan Park Academy of the University of
Chicago.   Formerly of the Boston Latin School

Cloth, 12mo, 320 pages, with illustrations   .   .   .   Price, $1.00

This book is the outgrowth of many years of thought and successful experience, and will be found carefully adapted to its purpose as a guide for Latin students during their first year's study.   It embodies the improvements in Latin teaching which have commended themselves to enlightened experience.

The pupil is early introduced to the connected text of Caesar, but that this introduction may not be too abrupt the first sixteen lessons contain an orderly presentation of the commonest forms and rules of the language.

The text is chosen especially for its simplicity and interest, and the total amount presented is greater than the second, third, or fourth books of the Gallic War, and meets the recommendations of the Committee of Twelve of the American Philological Association.

Special attention is given to the Vocabulary.   New words are compared with words previously learned, and a constant review of old words is kept up by means of abundant, easy exercises.

The exercises are abundant, well graded, and progressive.   In addition to the regular exercises for practice in translation, nearly every lesson contains Oral Exercises for class work and Written Exercises intended to serve as a review of topics and constructions previously studied.

A summary of Latin forms, with reference to the paragraphs of the book in which the given paradigms are treated, follows the regular lessons.   Pupils will find these forms convenient for use and reference in their studies.   A full and well selected vocabulary completes the book.

Caesar's Commentaries on the Gallic War

With Introduction, Notes, and Vocabulary. By ALBERT HARKNESS, Ph. D., LL.D.,
Professor Emeritus in Brown University. Assisted by CHARLES H. FORBES, A.B.,
Professor of Latin in Phillips Academy, Andover, Mass.
Price, $1.25

THIS WORK is preëminently a student's edition of Caesar's Commentaries on the Gallic War, and has been prepared with special reference to the present needs of preparatory and secondary schools. While it is remarkable for its simplicity, yet it contains everything which is needed for studying the author. Attention is called particularly to the following special features of the book :

1. This edition is furnished with an Introduction containing an outline of the life of Caesar, a description in brief of the scenes of his military operations in Gaul, Germany, and Britain, and a short treatise on the military system of the Romans, together with a list of valuable works on subjects treated in the Introduction.

2. The text is chiefly that of the critical edition of H. Meusel, Berlin, 1894, now quite generally accepted as the standard. Each important chapter begins with a brief summary in English.

3. The notes are intended to guide the faithful efforts of the student and to interest him in the stirring events recorded in the Commentaries. Special attention has been given to the difficult subjects of the subjunctive mood and of the indirect discourse.

4. The vocabulary gives special attention to etymology, but the treatment is made as simple as possible with the sole aim of aiding the student in understanding and appreciating the significant elements of words. The important subject of idioms and phrases receives due attention.

5. The illustrations are entirely appropriate and unlike those in most other works of a similar nature. They have in no instance been introduced merely for purposes of decoration. Among the most striking features of the work are the nine colored plates illustrative of the military system of the Romans, which have been made only after consultation with the highest authorities, and are here reproduced in their natural colors. Besides these, there are many other illustrations, eleven plans of battles, seven campaign maps, and a general map of Gaul.

VERGIL'S AENEID (Six Books) AND BUCOLICS.
    With Notes and Vocabulary.   Half Leather, 12mo, 564 pages,
    with Maps and Illustrations $1.50

Harper and Miller's Vergil furnishes not only the latest and best edition of the Aeneid and Bucolics, but is a most important addition to the study of Vergil's life, character, and writings. It is based on the same plan and possesses in a general way the same distinctive features which have given Harper and Tolman's Caesar such wide popularity and use. Among its special features are :

A GENERAL INTRODUCTION, including a collection of material for the literary study of Vergil not contained in any other similar text-book.

THE NOTES, which are unusually full and helpful. They include such aids for the study of Vergil as have never before been collated for the use of the general student.

THE MAP.—This has been carefully constructed to present all the places mentioned in the Aeneid and show the course of Aeneas from Troy to his final landing in Italy.

THE ILLUSTRATIONS.—Besides numerous smaller engravings, an entirely new feature in school text-books is furnished by the twelve full-page illustrations reproduced from carefully selected photographs of famous paintings and statues.

THE VOCABULARY.—Special pains have been expended on the vocabulary. Following the vocabulary is a list of all words which occur ten times or more in the books included in this edition of the Aeneid.

Lindsay's Cornelius Nepos

WITH NOTES, EXERCISES, AND VOCABULARY

EDITED BY

THOMAS B. LINDSAY, Ph.D.
Professor of Latin and Sanskrit, Boston University

Cloth, 12mo, 363 pages. Illustrated . . . . Price, $1.10

This edition of the Lives of Cornelius Nepos is virtually
a new work rather than a revision. The material of former
editions has been recast and enlarged. The text has been
thoroughly revised, and the notes and vocabulary entirely
rewritten. The grammatical references are placed at
the foot of the text-page. The text has over fifty illus-
trations and a fine double page map of the Roman Empire,
Greece, and the Chersonesus. The dates of all important
events are given in the text. The notes are accurate and
explain all difficulties, not giving mere translations without
hinting at their sources. The English-Latin exercises
have been rewritten and cover the full text of the twenty-
five Lives. These exercises, while easy and forming
connected sense, give thorough drill on special or difficult
constructions.

TEXT EDITION

For use in recitations and examinations a separate volume
is provided, containing the text alone. This edition will
be furnished at 40 cents per copy. Teachers whose classes
use the complete annotated edition will be supplied with
the Text Edition at special introductory terms. Corre-
spondence and orders should specify "Text Edition."

Introduction to the Study of Latin Inscriptions

By JAMES C. EGBERT, JR., Ph.D.
Adjunct Professor of Latin, Columbia University

Half Morocco, large 12mo, 468 pages. With numerous illustrations and
exact reproductions of inscriptions . . . . Price, $3.50

This work is designed as a text-book for the use of
students in Universities and Colleges, and also to furnish
an account of this branch of archaeological study for
general readers. It has been prepared in the belief that
a knowledge of epigraphy forms an essential part of the
equipment of a teacher of the classics, and that the sub-
ject itself has become so important as to justify its intro-
duction, in elementary form at least, into the curriculum
of undergraduate studies.

A distinctive feature of the book is the number and
character of its illustrations,—there being over seven
hundred cuts and diagrams of inscriptions, for the pur-
pose of illustrating the text, and for practice in reading.
Of these, over one hundred are photographic repro-
ductions, showing the forms of the letters and the
arrangement of the inscriptions. The work is also sup-
plied with an exhaustive bibliography and valuable tables
of abbreviations, archaisms, etc.

Latin Literature of the Empire

Selected and Edited with Revised Texts and Brief Introductions

By ALFRED GUDEMAN, Ph.D.

Associate Professor of Classical Philology, University of Pennsylvania

In Two Volumes.   Cloth, 12mo.   Per Volume, $1.80

Vol. I—Prose. Selections from Velleius, Curtius, Seneca Rhetor, Justinus (Trogus Pompeius), Seneca, Petronius, including Cena Trimalchionis, Pliny the Elder, Quintilian, Tacitus, Pliny the Younger, Suetonius, Minucius Felix Octavius, Apuleius—Ammianus Marcellinus, and Boethius.

Vol. II—Poetry. Pseudo Vergiliana, Aetna, Manilius, Calpurnius, Nemesianus, Phaedrus, Lucan, Valerius Flaccus, Seneca, the Octavia (anonymous), Persius, Statius, Silius Italicus, Martial, Juvenal, Pervigilium Veneris, Ausonius, and Claudianus.

The works of Latin Literature of the post-Augustan period have hitherto, with a few notable exceptions, been virtually excluded from the classical curricula of colleges and universities.

The present collection has been made primarily for the use of students in higher classes in colleges. The selections will be found useful as collateral reading in connection with lectures on classical literature, and will also furnish suitable material for sight reading.

The selections themselves contain nothing that is not eminently worthy of perusal. They are in every case sufficiently extensive to give a continuous and coherent story, which at the same time exhibits the author at his best. The text follows the best modern editions, the deviations from the standard texts being briefly recorded in critical appendices.

The First Greek Book

By CLARENCE W. GLEASON, A.M.
Master in the Roxbury Latin School

AND

CAROLINE STONE ATHERTON, A.M.
Late of the Roxbury Latin School

WITH AN INTRODUCTION
By WILLIAM C. COLLAR, A.M.

Cloth, 12mo, 299 pages . . . . Price, $1.00

This First Greek Book from its logical sequence of subjects, its clearness and conciseness of statement, and its freedom from unnecessary details, will appeal to both teacher and pupil. Believing that the true aim of Greek study is the development of the power to read Greek, the pupil is introduced at an early stage to practice in the translation of a continuous text, including dialogues, fables, and reading exercises.

The English-Greek exercises have been made subordinate to the sentences to be translated into English, as that will be the pupil's main work in the study of Greek. An effort has been made throughout to give continuity to the exercises for translation, and at the same time to fix meanings and constructions by frequent repetition and occasional review lessons.

The book is fully illustrated and contains in addition to the reading exercises given in the body of the book selections from the Anabasis, Hellenica, Cyropaedia, and Memorabilia, an Appendix containing in compendious form for reference the rules of euphony and syntax and the paradigms of declension and conjugation given in the regular lessons. Altogether, the book is complete, concise, interesting, and practical, and one which teachers can use successfully with any class of beginners.

A Spanish Grammar

FOR THE USE OF SCHOOLS AND COLLEGES

By SAMUEL GARNER, Ph.D.
Recently Professor of Modern Languages U. S. Naval Academy

Cloth, 12mo, 415 pages . . . . Price, $1.25

This grammar gives, in clear and concise outline, the essential features of the language. The author combines, in an unusual degree, an intimate knowledge of the Spanish language and of its idioms rarely found save in a native Spaniard, with the pedagogical devices and the insight into the needs of American students which only an American instructor of long experience can possess. The union of these two features places the book in the front rank of practical working text-books.

An especially serviceable feature of the book is the introduction of numerous business letters and forms, copied from those actually used by one of the leading Spanish firms in this country. Both the exercises and the Spanish reading matter, covering, as they do, a very wide range of subjects, embrace many features which serve as an introduction to an acquaintance with the commercial and social life of Spanish-speaking countries. No other grammar so thoroughly meets this want, and a mastery of its contents will place the student in a position where he may readily develop and apply his linguistic knowledge along these lines.

In view of the constantly growing importance of our relations with our Spanish-speaking possessions and neighbors, a book which will equip the student thoroughly with an accurate and ready knowledge of the language both for reading and conversation is an essential in all schools. Embodying methods employed and tested in many years of class-room instruction, this is such a book, and its use cannot fail to give results amply proportionate to the study expended on it.

New Text-Books in German

By I. KELLER

Professor of the German Language and Literature in the Normal College, New York.

KELLER'S FIRST YEAR IN GERMAN

Cloth, 12mo, 290 pages $1.00

KELLER'S SECOND YEAR IN GERMAN

Cloth, 12mo, 388 pages 1.20

These two books furnish a systematic and thorough course for beginners in German. They combine the best features of both the grammatical and natural methods of teaching. The lessons in each book afford suitable material for practice in reading, for oral and written exercises and translations, for conversational exercises, and for grammatical study. The student is encouraged from the first to speak and write German as the best means of gaining an intelligent knowledge and use of the language.

KELLER'S BILDER AUS DER DEUTSCHEN LITTERATUR

Linen, 12mo, 225 pages . . . . . . 75 cents

The plan of this work will commend itself to teachers who believe that the teaching of German literature should concern itself with the contents and meaning of the great works themselves more than with a critical study of what has been said about the works. With this aim the author gives a survey of the language and literature at its most important epochs, selecting for detailed study the chief works of each period and writer. A summary of the contents of each work so treated is given, generally illustrated by a quotation from the work.

The simplicity of the treatment and language adapts this work for younger students as well as for those of more advanced grades.

Text-Books in French

By ANTOINE MUZZARELLI

Officier d'Académie ; author of " Les Antonymes de la Langue
Française," " English Antonymes," " French Classics," etc.

MUZZARELLI'S ACADEMIC FRENCH COURSE—First Year . $1.00

    Second Year 1.00

    Keys to First and Second Years . . . . Each, 1.00

The Academic French Course embodies in two books a complete system of instruction in the French language for English-speaking pupils. The course is remarkable for the simplicity of its grammatical treatment and for the carefully selected vocabulary employed in the exercises and translations. It is eminently practical, advancing in a constant gradation from the easiest of first steps to those more difficult. Only essential rules are given, and those in the most concise form. Besides the usual grammatical drill, it includes lessons in conversational form, entitled " A Trip to Paris," replete with information of the most practical kind and largely increasing the student's vocabulary with an extensive variety of expressions in daily use among the educated classes in France.

MUZZARELLI'S BRIEF FRENCH COURSE $1.25

This is prepared on the same general lines, and though brief is comprehensive. The grammatical topics discussed have been wisely chosen, and all topics of primary importance are fully treated. The exercises in reading and writing French furnish abundant practice on all points of syntax. The book contains a valuable chapter on French Phonetics, as well as the poetry prescribed for memorizing by the Regents of the University of the State of New York. It is especially noteworthy in that it conforms in all respects to the radical reform incorporated in the new laws of syntax officially promulgated by the Minister of Public Instruction of the French Republic, on March 11, 1901.
